

Before you begin

- In the box are ZAURA Starters and Masters.
- Do not yet insert batteries in the Masters.
- Decide which configuration you prefer:
 - **Easiest Configuration**, for **Non-Dimming** systems (recommended): begin with **Step One**, over there on the right. 
 - **Custom Configuration**, for systems with **Dimmers**: refer to the next page.
 - For systems that will include **Range Extenders**, or for assistance, see the [ZAURA RF Wireless Lighting Control Installation Guide \(UM0229\)](#), available on www.zilog.com.
- Assemble your tools.
- See the www.zaura.com website for:
 - Troubleshooting info
 - Support materials, videos and documentation
 - Replacement parts ordering info

Installing a System *without* Dimming Controls

Step One

- A. Replace the existing starters with the ZAURA starters.
- B. Turn on the light switch (all lights should be illuminated).

Step Two

- A. Insert a battery in the Master.
- B. Wait 1 minute.
- C. Press the **Associate Non-Dimmer** button once and release.
- D. Wait 30 seconds to allow the association to complete.

Step Three

- A. Mount the base of the Master in the center of the room using the screws or the sticky tape provided.
- B. Attach the Master to the base.

Step Four

- A. Exit the room. Your lights should extinguish within a few minutes.
- B. Reenter the room. Your lights should illuminate.

Installing a System *with* Dimming Controls

Step One

- A. Identify the luminaries that you want to be **non-dimming** and replace their existing starters with the ZAURA starters.
- B. Turn on the light switch (all lights should be illuminated).

Step Two

- A. Insert a battery in the Master.
- B. Wait 1 minute.
- C. Press the **Associate Non-Dimmer** button once and release.
- D. Wait 30 seconds to allow the association to complete.

Step Three

- A. Identify the luminaries for which you want **dimming** capability and replace their existing starters with the ZAURA starters.
- B. Turn on the light switch (all lights should be illuminated).

Step Four

- A. Press the **Associate Dimmer** button once and release.
- B. Wait 30 seconds to allow the association to complete.

Step Five

- A. Mount the base of the Master in the center of the room using the screws or the sticky tape provided.
- B. Attach the Master to the base.

Step Six

- A. Exit the room. Your lights should extinguish within a few minutes.
- B. Reenter the room. Your lights should illuminate.
